HANSATMP is a vibrant and resourceful company leading the industry in hydraulic technology applications. HANSATMP provides a one-source supply for engineering and manufacturing of hydraulic components and complete systems. The efficiency and high flexibility of HANSATMP designers make it the best choice for companies that wish to entrust a team of professionals in the hydraulic field, to follow their products from design through to production, providing cutting-edge and complete solutions for every single need.
HANSA-TMP has been operating in hydraulic development and production on the national and international market since 1984. Over the years, we have constantly expanded our offer; today we provide a complete range of hydraulic components and systems. HANSA-TMP products, are recognised worldwide for their quality and reliability, achieved by means of the painstaking research and development, watchful of every aspect of product development and manufacturing. Continuous and careful controls over all the phases of the engineering and production process allow HANSA-TMP to meet the most critical market requirements.

ISO 9001 Quality Certification - ISO 14001 Environmental Certification
Our Engineering Team combines several specialist fields to accommodate a diverse range of industries including construction, agricultural, oil & gas production and processing, mining, power generation, recycling, marine and transport. From the initial phases of product design HANSA-TMP focuses on providing innovative solutions that generate efficiency improvement, productivity and reliability of hydraulic components and systems.
HANSA-TMP has been selected as official distributor by the major world players in the hydraulic field. Our market is expanding locally and globally thanks to the expertise acquired during the past decades; we are able to find the best fit for the most difficult applications. A team of engineers assists our customers during the setup phase, technical assistance, warranty and maintenance.

**Kawasaki**
- Based in Plymouth, UK, the factory is a highly automated manufacturing facility that produces a wide range of products including Axial Piston Pumps, Axial and Radial Piston motors, K-series pumps and Staffa motors.

**Hyropa**
- A German company concentrating on developing and manufacturing customised electro-hydraulic systems according to customers’ specifications. In addition, the company offers high-quality pressure switches and other hydraulic components.

**Rickmeier**
- Manufactures gear pumps, valves, special products and oil feed systems. Meeting particular customers’ wishes lies at the forefront of the daily operations.

**Wandfluh**
- High Quality Swiss made hydraulic valves with a plenty of special executions. The main focus is on poppet valves, proportional valves, miniature hydraulics, explosion proof valves and corrosion protected valves. Wandfluh has an own electronics development and production department.

**Dynex**
- Manufactures hydraulic components that operate to 1040 bar, including piston pumps, motors, directional control valves and pressure controls. They have been used worldwide for 60 years on difficult applications for mobile, industrial and marine and aircraft equipment.

**HKS**
- A German manufacturer with more than 40 years of experience in the hydraulic fields and manufactures rotary actuators, rotary lift combination.

**Danfoss-Nessie**
- A global innovation setter in water hydraulic equipment and parts such as valves, pumps, motors, nozzles, powerpacks and accessories manufacturing.
